

## Herbal Infused Smokables Are A Hit Sun God Medicinals Doubles Down On Initial Success and Expands Product Line

*Southern Oregon herbal manufacturer Sun God Medicinals expands their line of game changing herbal infused blunts and pre-rolls, focusing on the synergistic effect of blending medicinal herbs with cannabis.*

Central Point, OR - Sun God Medicinals announced today the release of its third herbal infused cannabis blunt. The first two blunts from Sun God Medicinals made their market debut in June of 2021, one sativa and one indica each offering a specific body effect. The company says that based on their immediate success and a strong demand from the public, they are now releasing a third blunt called Panacea Transition that is hybrid strain focused with herbs to support life's transitions.

This new blunt pairs top shelf hybrid cannabis flower, kief, and live resin oil with six medicinal herbs selected to help the mind and body deal with an ever changing world. Herbs like mullein, skullcap, chamomile, passionflower and more work together to help with life and body transitions. Soothing herbs chosen to help the body and mind adjust to change.

The first blunts released back in early summer were Hypnos Sleep Blunt with herbs like skullcap and lemon balm to help the body and mind in preparation for deep sleep and Heka Visionary Blunt featuring herbs such as damiana and motherwort meant to help relax the inner spirit in preparation for enhanced perception, mind expansion, and vision quests.

Due to the success of these new blunts Sun God Medicinals will also be offering pre-roll versions of these same three formulas in a single 1 gram pre-roll or a 2 pack of .5g pre-rolls

Sticking with the company’s commitment to bioregional herbalism only certified organic medicinal herbs that can be cultivated in Southern Oregon will be used in this new line of smokables. The company’s founder, Brie Malarkey, continues to offer cannabis products that bring medicinal herbs back into focus.

“I wanted a magical cannabis smoking experience that also introduces consumers to healing herbs,” said Malarkey. “Blending these herbs together with the cannabis Oregon consumers love offers the public a truly unique experience we know they will enjoy.”

These products are only available in OLCC-licensed, Oregon retail cannabis stores and plans are in place to expand this line further with a new line of pre-rolls in the near future with a single cannabis strain and a single supporting herb formulated for flavor.
